**To Whom It May Concern:**

I have been using Tamarack Grove Engineering for the past five years. Brian Sielaff has been my Structural Engineer of choice on majority of my projects. Brian is professional and thorough in everything he does for me. I use Tamarack Grove Engineering to complete all of my pre-building and remodel evaluation reports. These reports include detailed existing building structural conditions, seismic and structural areas of concern, local code implications, and recommendations. These evaluations allow me to complete accurate cost estimates and make sound capitol decisions.

As the Structural Engineer Brian was called upon to complete site survey and attend team design meetings. Brian handles issues promptly and correctly to minimize impact on projects. During our time working on projects together Brian maintains a professional attitude and has a positive impact on the overall project performance.

Tamarack Grove has proven a valuable member of my design team and I would highly recommend them.

Sincerely,

**Matt Medina**  
Sr. Project Manager
